

No More Primes!

The rules:

- On each turn, name a number and a category that number falls under
- That number and category are now eliminated
- The next player cannot say any number from that category, or any of the other categories that have come before it
- If you cannot say a number, or if you say a number in a category that has been eliminated, you are out
- Last player left wins!

An example:

Player 1

Player 2

“12, no more evens”

“21, no more numbers less than 30”

“37, no more primes”

“51, no more numbers ending in 1”

“ 10π , no more irrationals”

“1005, no more multiples of 3”

“55, no more numbers greater than 40”

“36.5, no more non-integers.”

“39, no more...”

Challenge! 39 is a multiple of 3.”

Player 2 wins!
